

# Takeaways of the cloud from a security perspective

- ▶ Do your due diligence, know what your vendor does and does not do for you
- ▶ Bring your security with you!
- ▶ Look to SaaS cloud security vendors, rapid innovation and availability
- ▶ Use your movement to the cloud as the opportunity to improve your security posture
- ▶ Monitoring and incident identification continues to be extremely important
- ▶ Multifactor everywhere
- ▶ Cloud can be more secure than on premise if done right
